

INDEX, OCTOBER 1971-AUTUMN 1973

BY GEORGE M. JENKS

This index is a supplement to D. W. Yungmeyer's *Fifty Year Index*, which appeared in the October 1971 *Bulletin*. It covers five numbers, 125-129 inclusive. Our intention is to produce the supplements at two-year intervals, with cumulations from time to time. It should be noted, that beginning with number 126, the name of the *Bulletin* was changed to *Railroad History*.

I have tried to follow the pattern set by Mr. Yungmeyer in his index, so that the two indexes are consistent. Where they differ, cross references are used. For example, an article about a person is listed under the person's name, and a reference "See names of individuals," is made under the heading "Biography," which is used in the 50-year index. Locomotive rosters are listed under both the heading "Locomotive rosters" and the name of the railroad with the subheading "Locomotives."

Every article is listed under author, title and usually one or more subjects. Book reviews are listed under both the author of the book and the author of the review, and by title under the heading, "Book reviews."

Book titles are italicized; issue numbers are in boldface type; paging includes the first and last pages, in order to indicate the length of the article; cross references are used whenever necessary.

Any suggestions for improvement of the index will be appreciated.

A

- Adler, Dorothy R. *British investment in American railways, 1834-1893*. Review, **125**, 111
